The Politics and Practices of Apartment Living Sep 03 2021 The majority of people now live in cities and for many that means apartment living. Apartments are where we spend our time, make our homes, raise our families and invest our money. Apartment living requires that we try to get along with our neighbours and make decisions collectively about the management of our buildings. This book examines how different housing markets, development practices, planning regimes, legal structures and social and cultural norms affect people's everyday experiences of apartment living.

The Relationship Between Chaotic Events and Credit Union Leadership Practices Aug 22 2020 Organizational crises, in modern society, requires an immediate response. Chaotic stages occur during organizational changes resulting in emotional experiences for leaders who develop intense feelings of anger, shock, and frustration. Leaders who are not prepared will be overwhelmed by the need for an aggressive response to change. The ability to solve problems successfully will increase movement of the organization through the chaos stage. Building a foundation of preparation for a leader, prior to the organizational change stage, will decrease levels of dysfunction the organization may experience. It is time for a new approach to managing organizational chaos. The research in this book provides original contributions to leadership studies by applying general systems and chaos theory to leadership behaviors in times of crisis. Chaos theory offers different perspectives that will allow leaders to develop capacities for changing their existing approaches to chaotic events. Results from the research in this study are valuable to credit union leaders, and also all business leaders, who need new models that recognize external factors influencing the sustainability of the organization. This adaptability is one of the most effective leadership skills a leader can display (Higgs & Rowland, 2005). Introducing general systems and chaos theory into organizational leadership has become a new approach to leadership psychology and philosophy, promising to influence leadership and management theories (Bums, 2002). The significance of chaos theory for leadership studies lies in its heuristic power. If the challenges to normal events are observed through the lens of chaos theory, organizational leaders may make better-informed decisions in times of uncertainty.

The Dynamics of Social Practice Mar 09 2022 Everyday life is defined and characterised by the rise, transformation and fall of social practices. Using terminology that is both accessible and sophisticated, this essential book guides the reader through a multi-level analysis of this dynamic. In working through core propositions about social practices and how they change the book is clear and accessible; real world examples, including the history of car driving, the emergence of frozen food, and the fate of hula hooping, bring abstract concepts to life and firmly ground them in empirical case-studies and new research. Demonstrating the relevance of social theory for public policy problems, the authors show that the everyday is the basis of social transformation addressing questions such as: how do practices emerge, exist and die? what are the elements from which practices are made? how do practices recruit practitioners? how are elements, practices and the links between them generated, renewed and reproduced? Precise, relevant and persuasive this book will inspire students and researchers from across the social sciences. Elizabeth Shove is Professor of Sociology at Lancaster University. Mika Pantzar is Research Professor at the National Consumer Research Centre, Helsinki. Matt Watson is Lecturer in Social and Cultural Geography at University of Sheffield.

Buddhist Nuns and Gendered Practice Apr 10 2022 Nirmala S. Salgado offers a groundbreaking study of the politics of representation of Buddhist nuns. Challenging assumptions about writing on gender and Buddhism, Salgado raises important theoretical questions about the applicability of liberal feminist concepts and language to the practices of Buddhist nuns. Based on extensive research in Sri Lanka as well as on interviews with Theravada and Tibetan nuns from around the world, Salgado's study invites a reconsideration of female renunciation. How do scholarly narratives continue to be complicit in reinscribing colonialist and patriarchal stories about Buddhist women? In what ways have recent debates contributed to the construction of the subject of the Theravada bhikkhuni? How do key Buddhist concepts such as dukkha, samsara, and sila ground female renunciant practices? Salgado's provocative analysis of modern discourses about the supposed empowerment of nuns challenges interpretations of female renunciation articulated in terms of secular notions such as 'freedom' in renunciation, and questions the idea that the higher ordination of nuns constitutes a movement in which female renunciants act as agents

seeking to assert their autonomy in a struggle against patriarchal norms. Salgado argues that the concept of a global sisterhood of nuns—an idea grounded in a notion of equality as a universal ideal—promotes a discourse of dominance about the lives of non-Western women and calls for more nuanced readings of the everyday renunciatory practices and lives of Buddhist nuns. *Buddhist Nuns and Gendered Practice* is essential reading for anyone interested in the connections between religion and power, subjectivity and gender, and feminism and postcolonialism.

The Nexus of Practices Sep 15 2022 *The Nexus of Practices: connections, constellations, practitioners* brings leading theorists of practice together to provide a fresh set of theoretical impulses for the surge of practice-focused studies currently sweeping across the social disciplines. The book addresses key issues facing practice theory, expands practice theory's conceptual repertoire, and explores new empirical terrain. With each intellectual move, it generates further opportunities for social research. More specifically, the book's chapters offer new approaches to analysing connections within the nexus of practices, to exploring the dynamics and implications of the constellations that practices form, and to understanding people as practitioners that carry on practices. Topics examined include social change, language, power, affect, reflection, large social phenomena, and connectivity over time and space. Contributors thereby counter claims that practice theory cannot handle large phenomena and that it ignores people. The contributions also develop practice theoretical ideas in dialogue with other forms of social theory and in ways illustrated and informed by empirical cases and examples. *The Nexus of Practices* will quickly become an important point of reference for future practice-focused research in the social sciences.

Tibetan Yoga Dec 26 2020 A visual presentation of Tibetan yoga, the hidden treasure at the heart of the Tibetan Tantric Buddhist tradition

- Explains the core principles and practices of Tibetan yoga with illustrated instructions
- Explores esoteric practices less familiar in the West, including sexual yoga, lucid dream yoga, and yoga enhanced by psychoactive substances
- Draws on scientific research and contemplative traditions to explain Tibetan yoga from a historical, anthropological, and biological perspective
- Includes full-color reproductions of previously unpublished works of Himalayan art

Tibetan yoga is the hidden treasure at the heart of the Tibetan Tantric Buddhist tradition: a spiritual and physical practice that seeks an expanded experience of the human body and its energetic and cognitive potential. In this pioneering and highly illustrated overview, Ian A. Baker introduces the core principles and practices of Tibetan yoga alongside historical illustrations of the movements and beautiful,

full-color works of Himalayan art, never before published. Drawing on Tibetan cultural history and scientific research, the author explores Tibetan yogic practices from historical, anthropological, and biological perspectives, providing a rich background to enable the reader to understand this ancient tradition with both the head and the heart. He provides complete, illustrated instructions for meditations, visualizations, and sequences of practices for the breath and body, as well as esoteric practices including sexual yoga, lucid dream yoga, and yoga enhanced by psychoactive plants. He explains how, while Tibetan yoga absorbed aspects of Indian hatha yoga and Taoist energy cultivation, this ancient practice largely begins where physically-oriented yoga and chi-gong end, by directing prana, or vital energy, toward the awakening of latent human abilities and cognitive states. He shows how Tibetan yoga techniques facilitate transcendence of the self and suffering and ultimately lead to Buddhist enlightenment through transformative processes of body, breath, and consciousness. Richly illustrated with contemporary ethnographic photography of Tibetan yoga practitioners and rare works of Himalayan art, including Tibetan thangka paintings, murals from the Dalai Lama's once-secret meditation chamber in Lhasa, and images of yogic practice from historical practice manuals and medical treatises, this groundbreaking book reveals Tibetan yoga's ultimate expression of the interconnectedness of all existence.

Clinical Practice Guidelines We Can Trust Dec 18 2022 Advances in medical, biomedical and health services research have reduced the level of uncertainty in clinical practice. Clinical practice guidelines (CPGs) complement this progress by establishing standards of care backed by strong scientific evidence. CPGs are statements that include recommendations intended to optimize patient care. These statements are informed by a systematic review of evidence and an assessment of the benefits and costs of alternative care options. Clinical Practice Guidelines We Can Trust examines the current state of clinical practice guidelines and how they can be improved to enhance healthcare quality and patient outcomes. Clinical practice guidelines now are ubiquitous in our healthcare system. The Guidelines International Network (GIN) database currently lists more than 3,700 guidelines from 39 countries. Developing guidelines presents a number of challenges including lack of transparent methodological practices, difficulty reconciling conflicting guidelines, and conflicts of interest. Clinical Practice Guidelines We Can Trust explores questions surrounding the quality of CPG development processes and the establishment of standards. It proposes eight standards for developing trustworthy clinical practice guidelines emphasizing transparency; management of conflict of interest ; systematic review--guideline development intersection; establishing evidence foundations for and

rating strength of guideline recommendations; articulation of recommendations; external review; and updating. Clinical Practice Guidelines We Can Trust shows how clinical practice guidelines can enhance clinician and patient decision-making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter, instead of implementing a one size fits all approach to patient care. This book contains information directly related to the work of the Agency for Healthcare Research and Quality (AHRQ), as well as various Congressional staff and policymakers. It is a vital resource for medical specialty societies, disease advocacy groups, health professionals, private and international organizations that develop or use clinical practice guidelines, consumers, clinicians, and payers.

Effective Clinical Supervision Dec 06 2021 The argument in this book is that the reflective process is at the heart of effective clinical supervision and sets out to review the most up-to-date literature on the topic, to make the case that reflective supervision is the centrepiece of the process and to show that it can be enhanced through critical reflective practice.

Mediated Identities in the Futures of Place: Emerging Practices and Spatial Cultures Nov 24 2020 This book examines the emerging problems and opportunities that are posed by media innovations, spatial typologies, and cultural trends in (re)shaping identities within the fast-changing milieus of the early 21st Century. Addressing a range of social and spatial scales and using a phenomenological frame of reference, the book draws on the works of Heidegger, Merleau-Ponty and Don Ihde to bridge the seemingly disparate, yet related theoretical perspectives across a number of disciplines. Various perspectives are put forward from media, human geography, cultural studies, technologies, urban design and architecture etc. and looked at thematically from networked culture and digital interface (and other) perspectives. The book probes the ways in which new digital media trends affect how and what we communicate, and how they drive and reshape our everyday practices. This mediatization of space, with fast evolving communication platforms and applications of digital representations, offers challenges to our notions of space, identity and culture and the book explores the diverse yet connected levels of technology and people interaction.

Backstage Practices of Transnational Law Apr 17 2020 This book explores the 'backstage' of transnational legal practice by illuminating the routines and habits that are crucial to the field, yet rarely studied. Through innovative discussion of practices often considered trivial, the book encourages readers to conceptualise the 'backstage' as emblematic of transnational legal practice. Expanding the focus of transnational legal scholarship, the book explores the seemingly mundane procedures which are often taken for granted,

despite being widely recognized as part of what it means to 'do transnational law'. Adopting various methodologies and approaches, each chapter focuses on one specific practice: for example, mooted exercises for law students, international travel, transnational time, the social media activities of lawyers and legal scholars, and the networking at the ICC's annual Assembly of States Parties. In and of themselves, these chapters each provide unique insights into what happens before the curtain rises and after it falls on the familiar 'outputs' of transnational law. It does more, however, than provide a range of different practices: it takes the next step in theorizing on the importance of the marginal and the everyday for what we 'know' to be 'the law' and what the international legal field looks like. Furthermore, by interrogating undiscussed academic practices, it provides students with a candid view on the perils and promises of transnational legal scholarship, inviting them to join the discussion and to practice their discipline in a more reflexive way. Written in an accessible format, containing a readable collection of personal and recognizable accounts of transnational legal practice, the book provides an everyday insight into transnational law. It will therefore appeal to international legal scholars, alongside any reader with an interest in transnational law.

Impact Evaluation in Practice, Second Edition Jan 19 2023 The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

Current Practices in Workplace and Organizational Learning Jul 01

2021 The central assumption that guides this book is that research and practice about learning at the workplace has recently lost its critical edge. This book explores what has happened to workplace learning and organizational learning and studies what has replaced it. In addition, the book discusses to what extent there are reasons to revitalize it. Today, themes such as 'innovation', 'co-creation' and 'knowledge sharing' seem to have become preferred and referred to as theoretical fields as well as fields of practice. In several chapters of this book it is argued that the critical power of learning could be regained by starting a new discussion of how these new fields of practice can be substantiated by topics such as learning arrangements, learning mechanisms, and learning strategies. Hence, the aim of this book is to both advance and recapture our knowledge of learning in today's increasingly complex world of work and organizing. The contributions in this work do so by revisiting classic research on workplace and organizational learning and discussing how insights from this body of literature evokes new meaning. It sets the stage for new agendas and rethinks current practices that are entangled in activities such as innovation, co-creation, knowledge sharing or other currently widespread fields of practice.

Global Perspectives on Sustainable Library Practices Jul 21 2020

Libraries as social and service-based institutions are constantly seeking innovative and effective ways to meet the needs of their users and maintain relevance amidst alternative information sources. They are constantly adjusting to meet the needs of users, contribute to the personal development of users, and align with national development. All of these have placed a burden on libraries to engage in sustainable practices both to increase their capacity to drive current developmental endeavors and to sustain future relevance. *Global Perspectives on Sustainable Library Practices* provides a rich and robust knowledge resource that brings together diverse sustainable library practices that will revamp library operations towards optimally meeting the current objectives of libraries as a developmental institution as well as sustaining value for future operations and service transactions. Covering topics such as access efficacy, green space development, and library service delivery, this premier reference source is an essential resource for librarians, library administrators, educators and administration of both K-12 and higher education, students of library sciences, pre-service teachers, researchers, and academicians.

Silverlock Feb 08 2022 Join an unlikely hero as he watches Moby-Dick sink the Pequod, dodges cannibals on Robinson Crusoe's island, raises a glass with Beowulf, and literally goes to Hell and back. This rollicking adventure begins with a shipwreck on an island where notable characters of literature, history, and folklore coexist – Hamlet and Oedipus, Don Quixote and Doctor Faustus, Becky Sharp and Daniel Boone. From carousing with Robin Hood to crossing swords with the Green Knight and stealing a ride on Huck Finn's raft, our traveler, A. Clarence Shandon, undertakes a whirlwind tour of the classics. And just as the truths of great stories ennoble those who take them to heart, a selfish and cynical drifter is transformed into the gallant knight known as Silverlock. "Here in your hand is the stuff of wonder," declared science-fiction author Poul Anderson,

adding, "There are few such glorious romps in all the world's literature, and surely none that surpass this one." Unjustly overlooked for decades, this book lover's book has developed a devoted cult following and richly deserves a wider audience. Whether or not you recognize its scores of literary allusions, you'll savor its wealth of battles, quests, romances, songs, and laughter.

Improving Accessible Digital Practices in Higher Education Feb 14 2020 This book examines the role played by technologies in removing the disadvantage experienced by students with disabilities in higher education. Addressing five key themes, the editor and contributors explore the practices required of stakeholders within higher education institutions to mediate successful and supportive relationships between disabled learners and their technologies. Ultimately, the book argues that practice in the fields of disability, ICT and higher education is still not providing consistent and widespread positive learning experiences to students with disabilities. In order to address this situation, the field needs to creatively integrate knowledge gained through both research and practice, and to re-imagine what is needed for ICT to meaningfully contribute to a reduction in disadvantage for disabled students. This book will be of interest and value to scholars of disability studies, education and accessibility, and educational technologies.

Parenting Matters May 11 2022 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about

parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Oracle BI Enterprise Edition Dashboard and Report Best Practices Jun 19 2020 BI Consulting Group has developed what is recognized as the most complete, most comprehensive set of dashboard and report design "best practice" standards ever developed, specific to Oracle Business Intelligence (formerly Siebel Business Analytics). These best practices have not been created simply to provide a "standard", instead they are based on the most important litmus test "what standards actually cause dashboards to be used, and what "best practices" of dashboard and report development provide insight into the business, rather than just reports. This guide was started with the Siebel Analytics 7.8.x platform, before Oracle acquired Siebel. The current version of the guide reflects Oracle's 10.1.3.3.x releases of Oracle Business Intelligence Enterprise Edition (OBIEE). Expect this guide to be enhanced and revised with subsequent major releases of OBIEE.

Delivering on the Promise of High-Impact Practices Jul 13 2022 Research shows that enriching learning experiences such as learning communities, service-learning, undergraduate research, internships, and senior culminating experiences - collectively known as High-Impact Practices (HIPs) - are positively associated with student engagement; deep, and integrated learning; and personal and educational gains for all students - particularly for historically underserved students, including first-generation students and racially minoritized populations. While HIPs' potential benefits for student learning, retention, and graduation are recognized and are being increasingly integrated across higher education programs, much of that potential

remains unrealized; and their implementation frequently uneven. Colleges are eager to use the HIP nomenclature for recruitment, promoting equity for traditionally underserved student populations, and preparing lifelong learners and successful professionals. However, HIPs defy easy categorization or standardized implementation. They rely on fidelity, quality, and consistency - being "done well" - to achieve their learning outcomes; and, above all, require attention to access and equity if they are to fulfill their promise of benefitting all student populations equally. The goal of *Delivering on the Promise of High-Impact Practices* is to provide examples from around the country of the ways educators are advancing equity, promoting fidelity, achieving scale, and strengthening assessment of their own local high-impact practices. Its chapters bring together the best current scholarship, methodologies, and evidence-based practices within the HIPs field, illustrating new approaches to faculty professional development, culture and coalition building, research and assessment, and continuous improvement that help institutions understand and extend practices with a demonstrated high impact. For proponents and practitioners this book offers perspectives, data and critiques to interrogate and improve practice. For administrators it provides an understanding of what's needed to deliver the necessary support.

International Beliefs and Practices That Characterize Teacher Effectiveness Aug 14 2022 Research surrounding teacher quality and teacher effectiveness has continued to grow and become even more prominent as teaching has become more professionalized globally and countries have invested more comprehensively in teacher education, certification, and professional development. To better understand teacher effectiveness, it is important to have a global viewpoint to truly understand how beliefs and practices vary in each country and can lead to different characterizations of what makes an effective teacher. This includes both cross-cultural commonalities and unique differences in conceptualization of teacher effectiveness and practices. With this comprehensive, international understanding of teacher effectiveness, a better understanding of best practices, teacher models, philosophies, and more will be developed. *International Beliefs and Practices That Characterize Teacher Effectiveness* identifies, shares, and explores the predominant conceptual understandings of beliefs and practices that characterize effective teachers in different countries. This book provides international and cross-cultural perspectives on teacher effectiveness and examines the prominent philosophies of teaching and pedagogical practices that characterize teachers in selected countries. Each chapter includes a background, such as history and undergirding philosophy within each country, effective teacher models, prominent applications of teacher effectiveness practices, and special or unique features of teaching in the specific countries mentioned. This book is

essential for practicing educators in various countries, teacher educators, faculty, and students within schools and colleges, researchers in international comparative studies, organizations engaged in international education, and administrators, practitioners, and academicians interested in how teacher effectiveness is characterized in different countries and regions across the world.

Right Research Sep 22 2020 The book is current and interdisciplinary, engaging with recent developments around this topic and including perspectives from sciences, arts, and humanities. It will be a welcome contribution to studies of the Anthropocene as well as studies of research methods and practices. –Sam Mickey, University of S. Francisco Educational institutions play an instrumental role in social and political change, and are responsible for the environmental and social ethics of their institutional practices. The essays in this volume critically examine scholarly research practices in the age of the Anthropocene, and ask what accountability educators and researchers have in ‘righting’ their relationship to the environment. The volume further calls attention to the geographical, financial, legal and political barriers that might limit scholarly dialogue by excluding researchers from participating in traditional modes of scholarly conversation. As such, Right Research is a bold invitation to the academic community to rigorous self-reflection on what their research looks like, how it is conducted, and how it might be developed so as to increase accessibility and sustainability, and decrease carbon footprint. The volume follows a three-part structure that bridges conceptual and practical concerns: the first section challenges our assumptions about how sustainability is defined, measured and practiced; the second section showcases artist-researchers whose work engages with the impact of humans on our environment; while the third section investigates how academic spaces can model eco-conscious behaviour. This timely volume responds to an increased demand for environmentally sustainable research, and is outstanding not only in its interdisciplinarity, but its embrace of non-traditional formats, spanning academic articles, creative acts, personal reflections and dialogues. Right Research will be a valuable resource for educators and researchers interested in developing and hybridizing their scholarly communication formats in the face of the current climate crisis.
