'This is one of the most heart-breaking stories I have read in a long, long time. The voices took hold of me from the beginning and then never let go.' - Mike Nicol

It's been 15 years of hiding for Muis. Now, with the Karoo veld so dry, Kapok, her man, insists on pointing their donkiekarretjie to Leeu Gamka, the one place Muis never wants to see again. Town means she can watch TV and maybe go to school, while her brother Fansie hopes there will be more food for him and their baby sister, Sponsie. Ours is a big country - South Africans, therefore, are used to driving vast distances

simply to get from A to B. Our aim here, therefore, is to make travelling those distances as interesting as possible. In South Africa for South Africans 23 driving routes of varying distances crisscross the entire country, many of them taking in national or provincial roads. There is plenty to explore across our nine provinces, and the big skies, boundless vistas and hours of sunshine have turned us into an outdoor-focused, activity-loving nation. With each province radically different in terms of biomes, landscape and climate, there is great incentive to slow down your journey and have fun with the family along the way. After all, a long journey is never solely about the destination. The intention of this book is not to focus only on the major tourist attractions that are so familiar to South Africans, but rather to turn away from heavily trodden visitor paths, delving into lesser known, more unusual activities. From hiking, mountain biking and wildlife and bird watching to birding, fishing and beach-combing, this book has some new surprises. Travellers are also invited to explore beyond the usually uninspiring main road that cuts through the little country towns. From quirky farm stalls, small-town museums, monuments and city walks to battlefields, cultural sites and interesting municipal parks, we've got them covered. You might even learn a few things you never knew about your own country... -- page 4 of cover.

the Booker Prize-winning author of *Schindler's List*. Most library disaster plans focus on response and recovery from collection and facilities disasters, such as fire and floods. But because technology is becoming ever more integral to libraries' role in their communities, any interruption in service and resources is a serious matter. This LITA guide
