Creek Basin, Kentucky, 1955-66 JavaScript:
The Good Parts***

Most programming languages contain good and bad parts, but JavaScript has more than its share of the bad, having been developed and released in a hurry before it could be refined. This authoritative book scrapes away these bad features to reveal a subset of JavaScript that's more reliable, readable, and maintainable than the language as a whole—a subset you can use to create truly extensible and efficient code. Considered the JavaScript expert by many people in the development community, author Douglas Crockford identifies the abundance of good ideas that make JavaScript an outstanding object-oriented programming language—ideas such as functions, loose typing, dynamic objects, and an expressive object literal notation. Unfortunately, these good ideas are mixed in with bad and downright

awful ideas, like a programming model based on global variables. When Java applets failed, JavaScript became the language of the Web by default, making its popularity almost completely independent of its qualities as a programming language. In JavaScript: The Good Parts, Crockford finally digs through the steaming pile of good intentions and blunders to give you a detailed look at all the genuinely elegant parts of JavaScript, including: Syntax Objects Functions Inheritance Arrays Regular expressions Methods Style Beautiful features The real beauty? As you move ahead with the subset of JavaScript that this book presents, you'll also sidestep the need to unlearn all the bad parts. Of course, if you want to find out more about the bad parts and how to use them badly, simply consult any other JavaScript book. With JavaScript: The Good Parts, you'll discover a beautiful, elegant, lightweight and highly expressive language that lets you create effective code, whether you're managing object libraries or just trying to get Ajax to run fast. If you develop sites or applications for the Web, this book is an

absolute must. Chip Block, the hero of Parts, is back, and still worried about falling apart based on the things he hears. This time he's made a list of all the strange, crazy things he's heard people say: "I lost my head." "My nose is running." "I sang my heart out. . . ." It's scary stuff, but he has a plan for making sure he doesn't accidentally leave any of his parts behind. A hilarious sequel to the wildly popular Parts and More Parts. Give me a hand . . . hold your tongue . . . scream your lungs out . . . what's a kid to do if he wants to keep all his body parts in place? Well, one thing is for sure, he'll have to be creative. Like, if you want to keep your heart from breaking, just make sure it's well padded and protected by tying a pillow around your chest. Want to keep your hands attached? Simple-stick them on with gloves and lots of glue. Just be careful not to laugh your head off! The plant's cells and their several specialized working subunits are examined in addition to chemical traits like color, scent, and the hormonal effects that turn leaves toward the light and allow other adaptations to the surroundings. And the major processes

driven by chemical changes over time that together are the life cycle of the plant are considered."--BOOK JACKET. Clarity; Jans book and her unique skills can be summed in that single word; Clarity. Jans ability to help her clients, her friends and now with this book her readers, comes from her innate understanding of how to help us identify and remove blocks, both emotional and intellectual, to clear thinking, giving us the momentum to move forward, toward our goals. Jack Fraenkel Chief Motivational Officer, Motivatories Jan took me on a journey into myself and showed me how I make decisions. Since returning from that journey my understanding of myself has made even harder choices much easier. Gary Roberts Chief Engineer, Leading Sydney Hotel The implications in ones professional and personal life are huge. Reactionary? Proactionary? Knowing what ego states one has means freedom of choice of behaviour and emotions. Lyn MacIntosh Counsellor, Clinical Hypnotherapist, NLP Master Practitioner. With the Many Parts of You Jan Sky has opened the door to a simple and effective

way to dealing with our own blocks to achieving what we want from life. Jans style and ease of writing give us an accessible tool that we can use whenever and wherever we choose. This book is a gift. Liz Cassidy Managing Director, Third Sigma International Jan uses ESI process with in-mates in prison with outstanding results. The in-mates feel empowered by their realization that there are more parts to their personalities than their criminal parts. They appear to grasp this concept and appear to use this in addressing their offending behaviour after attending her program Brenda Ambler Drug & Alcohol / Holistic Counsellor, Dept of Corrective Services This book includes the definitive development history of the most famous Velocette motorcycles, based on the author's earlier work, and the most comprehensive appendices ever published on this historic marque. The King of All Media is back, letting it all hang out in his outrageous new movie! Here's the reader's chance to discover the book that began the phenomenon. Studded throughout with Howard's favorite photos, this is the

original, in-your-face manifesto that will once again have fans storming the bookstore--and everyone else running for cover. I just don't know what's going on Or why it has to be But every day it's something worse What's happening to me? So begins this uproarious new story from the best-selling creator of *No Jumping on the Bed!*, *Green Wilma*, and other popular books. The young narrator has discovered a disturbing trend: There's fuzz in his belly button his toes are peeling and something just fell out of his nose. The last straw is a loose tooth, which convinces him of the awful truth his parts are coming unglued! *Parts* deals with a subject of deepest interest to every young child: the stuff our bodies shed. Parents will appreciate the reassuring message that it's all quite normal, while Tedd Arnold's comical illustrations and rhyming text are guaranteed to make young readers laugh their heads off. *Book Parts* tells the histories of the parts of a book that are not the main text: chapter heads, page numbers, introductions, indexes . . . Each of these elements emerged at a certain time

and developed in a particular way. The book is arranged into twenty two chapters, covering topics from front matter (title page, frontispiece, etc.) to back (errata list, endleaves, etc.), and each written by an expert on the subject but with an emphasis on lightness, so that its presentation is authoritative but not ponderous. The remarkable and inspirational story of Oksana Masters, who was born with radiation-induced birth defects and suffered appalling abuse as an orphan, before being adopted and moving to the US, where she went on to triumph over her challenges to win ten Paralympic medals in four different sports. Oksana Masters was born in the shadow of Chernobyl, with one kidney, a partial stomach, six toes on each foot, webbed fingers, no right bicep and no thumbs. Her left leg was six inches shorter than her right, and she was missing both tibias. Relinquished to the orphanage system by birth parents daunted by the staggering cost of their child's medical care, Oksana encountered numerous abuses, some horrifying. Salvation came at the age of seven when Gay Masters, an

unmarried American professor who saw a photo of the little girl and became haunted by her eyes, waged a two-year war against stubborn adoption authorities to rescue Oksana from her circumstances. In America, Oksana endured years of operations that included a double leg amputation. Still, how could she hope to fit in when there were so many things making her different? As it turned out, she would do much more than fit in. Determined to prove herself and fuelled by a drive to succeed that still smouldered from childhood, Oksana triumphed in not just one sport but four - winning against the world's best in rowing, biathlon, cross-country skiing and road cycling competitions. This is Oksana's astonishing story of journeying through a series of dark tunnels - and how, with her mother's love, she finally found her way into the light. Her message to anyone who doesn't fit in: you can find a place where you excel and where you have worth. Irina obsessively takes explicit photographs of the average-looking men she persuades to model for her, scouted from the streets of Newcastle. Placed on sabbatical from her

dead-end bar job, she is offered an exhibition at a fashionable London gallery, promising to revive her career in the art world and offering an escape from her rut of drugs, alcohol, and extreme cinema. The news triggers a self-destructive tailspin, centred around Irina's relationship with her obsessive best-friend, and a shy young man from her local supermarket who has attracted her attention.
