Drawing on first-hand ethnographic data, field interviews with interpreters, interviewees and decision-makers, observations and off-record comments, *The Asylum Speaker* examines discursive processes in the asylum procedure and the impact these processes may have on the determination of refugee status. The book starts from the assumption that far-reaching legal decisions often have to be made on very limited grounds. Unable to submit any evidence to substantiate their case, the only chance that many asylum seekers have is to argue their case during the oral hearings with public officials at the different asylum agencies. Maryns investigates the performance of the asylum seeker during these interviews and analyzes the relationship between narrative structuring and gradations of linguistic competence. She explores a number of related questions: first, how the interaction between applicants and public officials proceeds; second, how this interaction forms the discursive input into long and complicated textual trajectories, and third, how the outcome of these discursive processes affects the assessment of asylum applications. Maryns demonstrates how propositional aspects play a crucial role in the asylum procedure whereas little attention is paid to narrative-linguistic diversity and multilingual speaker repertoires. Her analysis reveals how insufficient insight into the linguistic structure and narrative features of the asylum account often results in a deficient processing of important details. In the late 1970s, Barbara Taylor, then an acclaimed young historian, began to suffer from severe anxiety. In the years that followed, Taylor's world contracted around her illness. Eventually, she was admitted to what had once been England's largest psychiatric institutions, the infamous Friern Mental Hospital in London. Claire Edington's fascinating look at psychiatric care in French colonial Vietnam challenges our notion of the colonial asylum as a closed setting, run by experts with unchallenged authority, from which patients rarely left. She shows instead a society in which Vietnamese communities and families actively participated in psychiatric decision-making in ways that strengthened the power of the colonial state, even as they also forced French experts to engage with local understandings of, and practices around, insanity. *Beyond the Asylum* reveals how psychiatrists, colonial authorities, and the Vietnamese public debated both what it meant to be abnormal, as well as normal enough to return to social life, throughout the early twentieth century. Straddling the fields of colonial history, Southeast Asian studies and the history of medicine, *Beyond the Asylum* shifts our perspective from the institution itself to its relationship with the world beyond its walls. This world included not only psychiatrists and their patients, but also prosecutors and parents, neighbors and spirit mediums, as well as the police and local press. How each group interacted with the mentally ill, with each other, and sometimes in opposition to each other, helped decide the fate of those both in and outside the colonial asylum. Powerful photographs of the grand exteriors and crumbling interiors of America's abandoned state mental hospitals. For more than half the nation's history, vast mental hospitals were a prominent feature of the American landscape. From the mid-nineteenth century to the early twentieth, over 250 institutions for the insane were built throughout the United States; by 1948, they housed more than a half million patients. The blueprint for these hospitals was set by Pennsylvania hospital superintendant Thomas Story Kirkbride: a central administration building flanked symmetrically by pavilions and surrounded by lavish grounds with pastoral vistas. Kirkbride and others believed that well-designed buildings and grounds, a peaceful environment, a regimen of fresh air, and places for work, exercise, and cultural activities would heal mental illness. But in the second half of the twentieth century, after the introduction of psychotropic drugs and policy shifts toward community-based care, patient populations declined dramatically, leaving many of these beautiful, massive buildings—and the patients who lived in them—neglected and abandoned. Architect and photographer Christopher Payne spent six years documenting the decay of state mental hospitals like these, visiting seventy institutions in thirty states. Through his lens we see splendid, palatial exteriors (some designed by such prominent architects as H. H. Richardson and Samuel Sloan) and crumbling interiors—chairs stacked against walls with peeling paint in a grand hallway; brightly colored toothbrushes still hanging on a rack; stacks of suitcases, never packed for the trip home. Accompanying Payne's striking and powerful photographs is an essay by Oliver Sacks (who described his own experience working at a state mental hospital in his book *Awakenings*). Sacks pays tribute to Payne's photographs and to the lives once lived in these places, "where one could be both mad and safe." This book is the most extensive and comprehensive history of mental health care and treatment in the 19th and 20th century dealing with the institution of asylum yet available. Included is a carefully constructed theoretical framework, methodology, and data source assessment, a consideration of the founding of county asylums and the removal of the insane from poorhouses, definitions and treatment of insanity in the late 19th and early 20th century, an investigation into the history of a case study in one mid-west county, and a constructive look at the creative development of Milwaukee's "best system" plan to treat the insane. *The Last Asylum* is Barbara Taylor's haunting memoir of her journey through the UK mental health system. A RADIO 4 BOOK OF THE WEEK SHORTLISTED FOR THE RBC TAYLOR PRIZE In July 1988, Barbara Taylor, then an acclaimed young historian, was admitted to what had once been England's largest psychiatric institution: Colney Hatch Lunatic Asylum, later known as Friern Hospital. This searingly honest, thought-provoking and beautifully written memoir is the story of the author's madness years, set inside the wider story of the death of the asylum system in the twentieth century. It is a meditation on her own experience of breakdown and healing, but also that of the millions of other people who have suffered, are suffering, will suffer mental illness. 'Personal story, psychoanalytic process, the experience of madness, the feel of being an inpatient in the last days of Friern, the history of the asylum . . . A beautiful memoir, engrossing' Independent 'Moving, brave and intelligent' Susan Hill, *The Times* 'Dazzling. A great achievement, full of life and hope' Sunday Telegraph Barbara Taylor's previous books include an award-winning study of nineteenth-century socialist feminism, *Eve and the New Jerusalem*; an intellectual biography of the pioneer feminist Mary Wollstonecraft; and *On Kindness*, a defence of fellow feeling co-written with the psychoanalyst Adam Phillips. She is a longstanding editor of the leading history journal, *History Workshop Journal*, and a director of the Raphael Samuel History Centre. She teaches History and English at Queen Mary University of London. Euphemia's working unhappily as a housekeeper for Bertram Stapleford at his ill advised new property, when the dramatic collapse of the kitchen floor sends her back to where it all began, Stapleford House. A visiting mystic disrupts the Staplefords unleashing old family rumours. Euphemia finds herself playing second fiddle to Bertram's new love, Beatrice Wilton, as she launches a project to investigate the new asylums. It is not long before Euphemia realizes that not only does Beatrice have her unscrupulous sights set on Bertram, but that her enterprises may be about to put them all in very great danger. Alan Cooper calls for a Software Revolution - his best-selling book now in trade paperback with new foreword and afterword. In *The End of Asylum*, three experts in immigration law offer a comprehensive examination of the rise and demise of the US asylum system, showing how the Trump administration has put forth regulations, policies, and practices all designed to end opportunities for asylum seekers and what we can do about it. "PPPP . . . To compress 200 years of psychiatric theory and practice into a compelling and coherent narrative is a fine achievement . . . What strikes the reader [most] are Shorter's storytelling skills, his ability to conjure up the personalities of the psychiatrists who shaped the discipline and the conditions under which they and their patients lived."--Ray Monk *The Mail on Sunday* magazine, U.K. "An opinionated, anecdote-rich history. . . . While psychiatrists may quibble, and Freudians and other psychoanalysts will surely squawk, those without a vested interest will be thoroughly entertained and certainly enlightened."--Kirkus Reviews. "Shorter tells his story with immense panache, narrative clarity, and genuinely deep erudition."--Roy Porter Wellcome Institute for the History of Medicine. In *A History of Psychiatry*, Edward Shorter shows us the harsh, farcical, and inspiring realities of society's changing attitudes toward and attempts to deal with its mentally ill and the efforts of generations of scientists and physicians to ease their suffering. He paints vivid portraits of psychiatry's leading historical figures and pulls no punches in assessing their roles in advancing or sidetracking our understanding of the

origins of mental illness. Shorter also identifies the scientific and cultural factors that shaped the development of psychiatry. He reveals the forces behind the unparalleled sophistication of psychiatry in Germany during the eighteenth and nineteenth centuries as well as the emergence of the United States as the world capital of psychoanalysis. This engagingly written, thoroughly researched, and fiercely partisan account is compelling reading for anyone with a personal, intellectual, or professional interest in psychiatry. Lunatic asylums were an inescapable hangover of Victorian Britain and they harnessed a certain stigma borne from an environment of fear and shame as well as the great unknown. For many families the asylum system helped create their darkest 'skeletons', and for Thomas (Tommy) Compton, it was unforgiving. In 1929 he was 23 years old when his mother had him sent to the Brookwood Lunatic Asylum in Surrey, his only ailment - a simple speech defect. Based on Tommy's own diary notes, *The Asylum Soul* is a disturbing account of an innocent young life ripped apart by unthinkable institutional failings, false hope and ultimate family betrayal. Three chilling novellas set in the world of the New York Times bestselling novel *Asylum*, which Publishers Weekly called "a strong YA debut." For the first time, these three terrifying stories will appear together with new found photographs perfect for new readers or diehard series fans looking for new clues and insights into the thrilling world of *Asylum*. This collection also features bonus sneak peeks at *Asylum*, *Sanctum*, and *Catacomb*, the novels that first introduced the Brookline asylum's legacy of terror. In *The Scarlets*, Cal is drawn into New Hampshire College's twisted secret society—one with a deadly initiation. In *The Bone Artists*, Oliver tries to make a little extra money for college by working for a seedy organization that traffics in human bones. In *The Warden*, a young nurse starts a new job at the Brookline asylum but soon becomes suspicious of its unorthodox procedures. . . .

The *Asylum* is a stunning exposé by a seasoned Wall Street journalist that once and for all reveals the truth behind America's oil addiction in all its unscripted and dysfunctional glory. In the tradition of *Too Big to Fail* and *Liar's Poker*, author Leah McGrath Goodman tells the amazing-but-true story of a band of struggling, hardscrabble traders who, after enduring decades of scorn from New York's stuffy financial establishment, overcame more than a century of failure, infighting, and brinkmanship to build the world's reigning oil empire—entirely by accident. Earth has been controlled for eons by the 'dark forces' by instilling a project of 'fear', and we have all been deceived on a grand scale. They have achieved this by stealth through their secret societies, groups, governments and institutes to create a New World Order. They have controlled populations and culled humans through their man-made diseases such as Ebola and HIV/AIDS. They control humanity with prescription drugs, technology, food additives, vaccines and they suppress the cures for cancer. They control the media, create wars and initiate acts of terrorism. They control politics, banking, education, sciences and religions. They are followers of Satanism and some are paedophiles. They use mind control programmes and control the illegal drugs trade, manipulate the weather and have introduced a 'police state' and have suppressed free-energy. This is part of the spiritual battle between the 'dark forces' and the 'forces of light'. Welcome to the lunatic asylum that is planet Earth.

FROM THE WINNER OF THE CWA INTERNATIONAL DAGGER 2010 FOR THE DARKEST ROOM 'A compelling and scary psychological thriller' - Sunday Mirror Who amongst us can really say they're sane? Jan has just started working at the Dell nursery. But this is no normal nursery. It's linked to a high-security asylum by a dimly-lit underground tunnel, which is used for the children to visit their parents. Who are some of the most dangerous psychopaths in the country. And Jan has complicated reasons for being here. There's something he's not telling people about his past. And there's someone in the asylum who he really wants to see. . . . This book argues that states have a special obligation to offer asylum as a form of reparation to refugees for whose flight they are responsible. It shows the great relevance of reparative justice, and the importance of the causes of contemporary forced migration, for our understanding of states' responsibilities to refugees. Part I explains how this view presents an alternative to the dominant humanitarian approach to asylum in political theory and some practice. Part II outlines the conditions under which asylum should act as a form of reparation, arguing that a state owes this form of asylum to refugees where it bears responsibility for the unjustified harms that they experience, and where asylum is the most fitting form of reparation available. Part III explores some of the ethical implications of this reparative approach to asylum for the workings of states' asylum systems and the international politics of refugee protection. Accounts by women placed in asylums from 1840 to 1945 provide a chilling study of psychiatric institutions and attitudes toward women Based on the scripts for the BBC television serial written by Donna Franceschild. This production was first performed at the Citizens Theatre on 14 February 2013. Performances at the Citizens Theatre, Glasgow, 14 February-9 March 2013. Performances at the Royal Lyceum Theatre, Edinburgh, 13 March-6 April 2013. Closing The Asylum: The Mental Patient in Modern Society. The Covid-19 pandemic has affected the mental health of almost everyone, but it has impacted most severely on disadvantaged groups such as people with severe mental health problems, throwing pre-existing inequalities into sharper and starker relief. Though they had mostly all been closed by the turn of the century, the passing of the old Victorian asylums is still a matter of enduring controversy. In this acclaimed book, first published almost thirty years ago, Peter Barham examines the changing fortunes of mental patients in the era of the asylum and after. He demonstrates powerfully that the closure of mental hospitals cannot meet the real needs of people with severe mental health problems without a profound rethinking of the role, rights and status of the former mental patient in society. In a prologue to this new edition, he highlights the ironies of a post-asylum present afflicted by welfare minimalism, widespread deprivation and impoverishment, and a dramatic increase in the use of coercion and constraint in the delivery of mental health care. Closing the Asylum sets the scene for understanding how the experience of being treated as second class citizens has come about, and the author's forceful warnings of the dangers in the current mental health scene are highly germane to any consideration of what must change in our society after Covid. Veteran mental health survivor and campaigner Peter Campbell also contributes a preface in which he examines the passing of the asylums, and their after-life, in the light of his own experience. Perfect for fans of *The Doll Factory* and *The Glass House*, this is the intoxicating story of one woman's fight for freedom against a system built to silence her. WELCOME TO ANGELTON LUNATIC ASYLUM. ONCE YOU'RE IN, IT'S MURDER GETTING OUT. It is 1906 and Maud Lovell has been at Angelton for five years. She is not sure how she came to be there and knows nothing beyond its four walls. Hysterical, distressed and untrustworthy, she is badly unstable and prone to violence. Or so she has been told. When a new doctor arrives, keen to experiment with the evolutionary practice of medical hypnosis, Maud's unknown history makes her the perfect case study. But as Doctor Dimmond delves deeper into the past, it becomes clear that confinement and high doses are there to keep her silent. When Maud finally remembers what has been done to her, and by whom, her mind turns to her past – and to revenge. . . .

This book explores how the body was investigated in the late nineteenth-century asylum in Britain. As more and more Victorian asylum doctors looked to the bodily fabric to reveal the 'truth' of mental disease, a whole host of techniques and technologies were brought to bear upon the patient's body. These practices encompassed the clinical and the pathological, from testing the patient's reflexes to dissecting the brain. Investigating the Body in the Victorian Asylum takes a unique approach to the topic, conducting a chapter-by-chapter dissection of the body. It considers how asylum doctors viewed and investigated the skin, muscles, bones, brain, and bodily fluids. The book demonstrates the importance of the body in nineteenth-century psychiatry as well as how the asylum functioned as a site of research, and will be of value to historians of psychiatry, the body, and scientific practice. The volume explores American attitudes toward crime, madness, poverty and delinquency, and demonstrates how these ideas shaped both the design and the routine of the new institutions. There were no available models for the asylum; it had to be imagined and fabricated with few guiding precedents. The results revolutionized the treatment of the deviant and dependent and have profoundly affected the structure of modern society. The nineteenth-century asylum was the scene of both terrible abuses and significant advancements in treatment and care. The essays in this collection look at the asylum from the perspective of the place itself – its architecture, funding and purpose – and at the experience of those who were sent there. With the advent of care in the community for the mentally afflicted, the self-contained villages for the apparently insane have now been consigned to the history books. These once bustling Victorian institutions were commonly known in the nineteenth and early twentieth centuries as the county asylum or the pauper lunatic asylum, and were an accepted and essential part of society for nearly two centuries. It is difficult to believe that, in 1914, there were 102 such asylums, accommodating over 100,000 patients, the majority of whom lived their entire lives under care and treatment. In 2014, with the exception of those that have already been demolished, these buildings now lie empty and derelict, or have been converted for contemporary living. Through this photographic book, we

journey into the inner sanctum of a world of lost dreams, where hope was more often than not unwillingly traded for an uncomfortable acceptance. One of the most critical developments within 'welfare' in recent years, has been the transformation of service users from 'passive recipients' to 'active subjects' of welfare policy and practice. People who use services have challenged paternalistic notions that professionals are always the experts, and have offered alternative analyses both of the experience of living with disability or illness, and of policy and practice responses to such experiences. Taking Over the Asylum explores the way in which users or survivors of mental health services - people too often regarded as 'lacking capacity' to make decisions about their own care - have taken action to empower themselves. The authors examine evidence of the impact this action has had on their lives, on services, and on practice in mental health. They argue that disempowerment can be exacerbated by racist and gendered assumptions and they question the way we think about 'mental health' and 'mental illness' and what it means to live with 'madness'. Drawing on the writings of activists and on international research evidence of action by users and survivors, this important book explores different strategies being adopted to achieve change both within the mental health system and in the lives of those who live with psychological distress. The wide-ranging analysis of current debates provides a valuable and clear insight into the potential and dilemmas of collective action by service users and survivors. Starry Night is a fully illustrated account of Van Gogh's time at the asylum in Saint-Remy. Despite the challenges of ill health and asylum life, Van Gogh continued to produce a series of masterpieces – cypresses, wheatfields, olive groves and sunsets. He wrote very little about the asylum in letters to his brother Theo, so this book sets out to give an impression of daily life behind the walls of the asylum of Saint-Paul-de-Mausole and looks at Van Gogh through fresh eyes, with newly discovered material. Investigating the global system of detention centers that imprison asylum seekers and conceal persistent human rights violations Remote detention centers confine tens of thousands of refugees, asylum seekers, and undocumented immigrants around the world, operating in a legal gray area that hides terrible human rights abuses from the international community. Built to temporarily house eight hundred migrants in transit, the immigrant “reception center” on the Italian island of Lampedusa has held thousands of North African refugees under inhumane conditions for weeks on end. Australia’s use of Christmas Island as a detention center for asylum seekers has enabled successive governments to imprison migrants from Asia and Africa, including the Sudanese human rights activist Abdul Aziz Muhamat, held there for five years. In The Death of Asylum, Alison Mountz traces the global chain of remote sites used by states of the Global North to confine migrants fleeing violence and poverty, using cruel measures that, if unchecked, will lead to the death of asylum as an ethical ideal. Through unprecedented access to offshore detention centers and immigrant-processing facilities, Mountz illustrates how authorities in the United States, the European Union, and Australia have created a new and shadowy geopolitical formation allowing them to externalize their borders to distant islands where harsh treatment and deadly force deprive migrants of basic human rights. Mountz details how states use the geographic inaccessibility of places like Christmas Island, almost a thousand miles off the Australian mainland, to isolate asylum seekers far from the scrutiny of humanitarian NGOs, human rights groups, journalists, and their own citizens. By focusing on borderlands and spaces of transit between regions, The Death of Asylum shows how remote detention centers effectively curtail the basic human right to seek asylum, forcing refugees to take more dangerous risks to escape war, famine, and oppression. They arrive alive. They leave dead. But first, they give me their confessions. My name is Jack Steen. That name shouldn't mean anything to you. Unless you're about to die. And then I'm your bloody guardian angel. I work as a night nurse in the Asylum for the criminally insane. My name is the only real name you'll find in this book. I won't tell you which hospital I work at. I won't tell you the names of those dying. But I won't lie to you. You'll read exactly what I'm told. If you're smart, if you're deranged enough to read between the lines, you'll know who is telling the story. They could be playing their final game with me by messing with my head. Now, maybe they're messing with yours too. Inside this book are 4 confessions: One has an interesting 'appetite'. One was the Ken to his Barbie, and he would do anything to keep her happy. Another is a Nanny, but not one you want watching your kids. The other is the sweetest soul you'd ever meet but you'll have a hard time reading her confession. WARNING: There is swearing in this book. And some stories might be a trigger for something you have a hard time handling. But, these are the confessions of serial killers, mass murderers and such. NOTE: These once were published as novellas. Now they're in a full length novel. Deal with it. Want to read the next set of Confession books? Her memoir graphically describes her experiences in war zones and disasters around the world, from the Balkans and 'mission-accomplished' Iraq, to tsunami-affected Indonesia, post-earthquake Haiti and 'the Jungle' in Calais. This historical account of the care of insanity outside formal instruction explores key issues relating to the social history of madness from 1750 to the present day. These include women and the social construction of madness, the boarding out of lunatics by poor law authorities, familial care and treatment of the insane and the practice of mental healing by general practitioners. This book traces the role played by music within asylums, the participation of staff and patients in musical activity, and the links drawn between music, health, and wellbeing. In the first part of the book, the author draws on a wide range of sources to investigate the debates around moral management, entertainment, and music for patients, as well as the wider context of music and mental health. In the second part, a series of case studies bring to life the characters and contexts involved in asylum music, selected from a range of public and private institutions. From asylum bands to chapel choirs, smoking concerts to orchestras, the rich variety of musical activity presents new perspectives on music in everyday life. Aspects such as employment practices, musicians' networks and the purchase and maintenance of musical instruments illuminate the 'business' of music as part of moral management. As a source of entertainment and occupation, a means of solace and self-control, and as a device for social gatherings and contact with the outside world, the place of music in the asylum offers valuable insight into its uses and meanings in nineteenth-century England.
